

# EASTERN HANCOCK SCHOOLS

## Science & Engineering Fair

### **All Middle and High School Students!**

It's time to begin thinking about Eastern Hancock's Science Fair! The competition will be February 9. Now is the time to start. Here's why:

1. Science is fun!
2. There are prizes to be earned at Eastern Hancock.
3. There is money to be earned if you go on to compete at a regional or state level.
4. Here is your chance to explore your areas of interest. Think about the science in any of these areas: Music, Engineering, Foods, Math, Art, Statistics, Agriculture, Technology, and Environment.
5. It looks great on a resume or college application, especially if you are interested in pursuing a science related career.
6. If you wish, you may team up with another student. To conduct a team project, both of you will need to be actively involved in the research, preparation, and presentation of the project.

### **Interested? Here's what you need to do:**

1. Fill out this form and turn it in to your science teacher or Mrs. Huffman, saying what your idea is and that you are interested in participating. You can change your idea later if you wish, just let us know!
2. Develop your project with the requirements that we give you. These are created from years of experience as well as the requirements at Regional and State.
3. Ask questions of your science teacher as needed.
4. Turn in your project; we will notify you of the exact dates and times. Check your email!

For more information, visit our Science Fair webpage by going to [www.easternhancock.org](http://www.easternhancock.org), under schools click on your school, then the Science and Engineering Fair is a Quick Link.
