

BUILDING AN ABSTRACT

THE FIRST sentence should restate the purpose of the experiment
THE SECOND sentence should restate your hypothesis
THE THIRD sentence should restate your null hypothesis
THE FOURTH-FIFTH sentences summarize the procedure including how you established the control (this is NOT a list...use sentences)
THE SIXTH-EIGHTH sentences summarize the data, including the statistical analysis and error analysis (this is NOT data tables...use sentences to explain the findings)
THE NINTH-TENTH sentences summarize your conclusion being sure to mention whether the results supports the hypothesis or null hypothesis and reference your statistics here that support your conclusion.
